

Type 1

	RIGHT EYE	LEFT EYE
Sphere	+ 1.25 1	+ 1.50 5
Cylinder	- 0.75 2	- 0.75 6
Axis	45 3	180 7
Add	+ 2.00 4	+ 2.00 8
PD	62/59 9	

Type 2

	Sphere	Cylinder	Axis	Add
RIGHT	+ 1.25 1	- 0.75 2	45 3	+ 2.00 4
LEFT	+ 1.50 5	- 0.75 6	180 7	+ 2.00 8

Type 3

	RIGHT EYE	LEFT EYE
Sphere	+ 1.25 1	+ 1.50 5
Cylinder	- 0.75 2	- 0.75 6
Add	+ 2.00 4	+ 2.00 8
PD	32	32

$\times 45$ **3** $\times 180$ **7**

————— **9** —————

Type 4

	1	2	3	4	
R	+ 1.25	/ - 0.75	x 45	Add + 2.00	
L	+ 1.50	/ - 0.75	x 180	Add + 2.00	PD 62
	5	6	7	8	9

How To Read Your Prescription

In order to finalise your Fuglies Prescription Sunglasses order we will need 9 eye measurements from you. The prescription that your optometrist has given you will show all of the measurements we need, but depending on its layout the numbers may be in different places on the prescription.

The figure to the left shows the 4 main prescription layouts and each of the measurements we need are shown labeled 1-9. These 9 numbers should be entered into the Prescription Information form on the Fuglies website.

1. Right Eye Spherical Measurement (Also called OD-SPH)
2. Right Eye Cylindrical Measurement (Also called OD-CYL)
3. Right Eye Axial Correction Measurement (Also called OD-AXIS)
4. Right Eye Near-Distance ADD Correction (Also called OD-ADD)
5. Left Eye Spherical Measurement (Also called OS-SPH)
6. Left Eye Cylindrical Measurement (Also called OS-CYL)
7. Left Eye Axial Correction Measurement (Also called OS-AXIS)
8. Left Eye Near Distance ADD Correction (Also called OS-ADD)
9. PD - The horizontal distance between your eye's pupils.

A few pointers:

- The + and – symbols are very important. If a measurement has one of these **it must be entered into the Prescription Information form.**
- If cylinder and/or axis measurements have been left blank for one eye, or SD is shown for the cylinder measurement, this means the value is actually zero (0.00).
- A prescription may have two numbers for the PD written as 62/59 (as shown in the Type 1 prescription). In this case the first number (62) is your distance vision PD, and the one to be entered into our order form.
- PD may also be written as a separate number for each eye (as shown in the Type 3 prescription). The PD number we need is the sum of these 2 numbers. In the case of the example, 32+32=64.
